SKILLS

Languages	Java, TypeScript, Python, C
Frameworks	Spring Boot (WebFlux), NestJS, FastAPI, Vue.js, React, JavaFX
Databases	MySQL, PostgreSQL, MongoDB, Redis, H2
Tools	Docker, Bitbucket Pipelines, AWS, Linux, Kafka, Grafana, CloudWatch, Maven
Practices	OOP, SOLID, Clean Architecture, REST APIs, Automated Testing, CI/CD

EXPERIENCE

Backend Developer Segware	Sep 2024 - Present <i>Campinas, Brazil</i>
-------------------------------------	---

- Implemented a decoupled integrator using Node.js (NestJS) and Kafka, based on REST APIs and asynchronous messaging, reducing coupling and eliminating direct database access.
- Resolved critical legacy issues leveraging Grafana and CloudWatch for log and metrics analysis, improving production stability.
- Integrated new devices through Java (Spring Boot) services and developed React interfaces for operational workflows.

Fullstack Developer AGSinn	May 2022 - Sep 2024 <i>Belo Horizonte, Brazil</i>
--------------------------------------	--

- Maintained and enhanced access control systems built with Java (Spring Boot) and PostgreSQL, improving reliability and performance.
- Developed system integrations using Python (FastAPI) and refactored a self-service kiosk application with Vue.js, Linux, Bash, Python, and Java.
- Containerized applications with Docker and implemented CI/CD pipelines using Bitbucket Pipelines to automate build and deployment processes.

PROJECTS

e-mobiliária. Desktop application for managing property lease contracts, covering the full lifecycle of a rental agreement. Complete implementation in Java 24 with JavaFX as the UI framework, using Package-by-Feature architecture with Domain, Application, Infrastructure, and UI layers following Clean Architecture principles. Features include: CRUD operations for individuals and legal entities, property management, 8-step wizard for contract creation, receipt issuance, and financial reporting—all with PDF export using JasperReports. Technical stack: Java 24, JavaFX 21, Google Guice 7 (dependency injection), H2 (embedded database), Flyway (migrations), JFreeChart (charts), and Maven.

SISPEQ. Quality control report generation system for oil refineries. Designed and implemented a fully reactive backend using Spring Boot (WebFlux), modular architecture, and modern Java practices for high-performance document processing. Developed the frontend with Vue 3 and TypeScript following clean architecture principles, ensuring scalability, maintainability, and strong separation of concerns across the stack.

EDUCATION

Bachelor of Information Systems , Federal University of Minas Gerais	Mar 2022 - Jun 2027
---	---------------------

Technical Degree in Electronics , Federal Center for Technological Education of Minas Gerais	2019 - 2021
---	-------------
